Education

M.A. in Statistics and Data Science, Washington University in St. Louis
Expected May 2027
Selected Coursework: Theory of Statistics I & II, Advanced Linear Models, Statistical Computation, Topics in Machine Learning, Bayesian Statistics, Stochastic Processes, Causal Inference

B.A. in Economics and Mathematics, New York University Abu Dhabi (NYUAD)
May 2025
Study Away at New York University, New York (Spring 2024)
Selected Coursework: Honors Real Analysis I & II, Mathematical Statistics, Advanced Econometrics, Applied Optimization, Time Series and Forecasting

Research and Professional Experience

Incoming Research Intern, Institute for Informatics, Data Science, and Biostatistics (I²DB), Washington University School of Medicine

Supervisor: [Prof. Ruijin Lu](#) Starting May 2026

- Implementing Bayesian Additive Regression Tree (BART) methods for index modeling with functional predictors in biomedical applications
- Designing simulation studies to evaluate estimator performance under multiple high-dimensional and longitudinal data settings

Research Assistant, Washington University in St. Louis

Supervisor: [Prof. Joseph Feldman](#) Jan 2026 – Present

- Designing and running Monte Carlo simulation studies (200+ replications) to compare three quantile estimators under 12 scenarios with varying heteroskedasticity and sample size up to 5,000
- Developing scalable simulation and inference pipelines in R and Stan for high-dimensional causal inference and quantile estimation

Research Assistant, Topics in Labor Economics and Microeconometrics

Supervisor: [Prof. John C. Ham](#) May 2024 – Dec 2024

- Cleaned, organized, and analyzed approximately 900,000 labor-market observations involving unemployment rates, wages, and education levels from U.S. Department of Labor datasets
- Conducted empirical analysis using regression and difference-in-differences techniques in labor economics and microeconometrics with a focus on labor supply modeling

Research Assistant, NYUAD Center for Interacting Urban Networks (CITIES)

Supervisors: [Prof. Kinga Makovi](#) and [Prof. Thomas Marlow](#) May 2023 – Dec 2023

- Developed a database containing over 100 million entries to analyze ESG trends and institutional investment behavior
- Cleaned, merged, and standardized over 20 datasets containing corporate earnings call transcripts and institutional shareholder investment records
- Built a large-scale textual and network dataset with approximately 100,000 ESG and climate-risk observations using named entity recognition, topic modeling, and sentiment analysis

- Analyzed variation in ESG investment behavior across industries and major institutional shareholders based on the constructed dataset

User Experience Researcher Intern, [Trainsquare](#) October 2022 – January 2023

- Conducted user research and surveys involving approximately 50 users to understand user preferences, behaviors, and pain points on a workshop-hosting platform
- Performed A/B testing and competitor analysis to evaluate user engagement strategies and identify opportunities for product improvement
- Designed wireframes and interactive prototypes in Figma to support interface redesign and workflow simplification initiatives
- Collaborated cross-functionally with designers, product managers, and other stakeholders to translate research findings into actionable product recommendations

Technical Skills

Languages: R, Python, SQL

Libraries/Tools: Stan, tidyverse, ggplot2, dbarts, pandas, TensorFlow/Keras, scikit-learn

Honors

Four-Year Merit Scholarship

National 2nd Place in Abu Dhabi National Oil Company (ADNOC)-Bloomberg Energy Investment Competition, 2023
